Data Classification

Effective Date:	2099-03-01	**Policy Number:**	99 TST 2052
Applicability/Class:	Synthetic Standard	**Dept.:**	Data Stewardship
Date of Review:	2099-08-15	**Approval:**	Synthetic Approval Authority 7

I. Purpose and Scope

Data Classification Standard governs classification and handling of organizational information for Data Stewardship and authorized supporting roles.

The required control is to label information and apply controls proportional to sensitivity. This document does not authorize activity outside its stated scope.

Control identifier CTL-027 distinguishes this requirement from similar controls in related documents.

II. Definitions and Responsibilities

Accountable Owner means the role responsible for the classification decision and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate identified owner, business impact, sharing boundary, and retention need.

The originating operator supplies facts; the Data Stewardship reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2005 and 99 TST 2040, but each document retains its own decision boundary.

III. Required Controls

1. Create the classification decision. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify identified owner, business impact, sharing boundary, and retention need. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2050.

IV. Procedure and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-027. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2005 and 99 TST 2040 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Records, References, and Review

The authoritative output is the classification decision; preserve its identifier, owner, timestamps, evidence, approval, and disposition.
