Access Authorization

Effective Date:	2099-04-01	**Policy Number:**	TST-9050
Applicability/Class:	Synthetic Form	**Department:**	Human Resources
Date of Review:	2099-09-15	**Approval:**	Synthetic Approval Authority 8

I. Instructions and Record Identity

Access Authorization Form governs authorization of workforce or third-party system access for Human Resources and authorized supporting roles.

The required control is to capture identity, sponsor, role, systems, dates, and approvals. This document does not authorize activity outside its stated scope.

Control identifier CTL-028 distinguishes this requirement from similar controls in related documents.

II. Requester, Scope, and Dates

Accountable Owner means the role responsible for the access authorization and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate least privilege plus complete owner and expiration data.

The originating operator supplies facts; the Human Resources reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2050 and 99 TST 2051, but each document retains its own decision boundary.

III. Risk and Control Selection

1. Create the access authorization. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify least privilege plus complete owner and expiration data. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2053.

Field	Value	Required	Status
Record	access authorization	Yes	Entered
Owner	Human Resources	Yes	Verified
Control	CTL-028	Yes	Reviewed

IV. Review Decision and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-028. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2050 and 99 TST 2051 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Certification, References, and Retention

The authoritative output is the access authorization; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2050; 99 TST 2051; 99 TST 2053.

Review this document on 2099-09-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
