Incident Intake

Effective Date:	2099-06-01	**Policy Number:**	TST-9030
Applicability/Class:	Synthetic Form	**Dept.:**	Incident Response
Date of Review:	2099-11-15	**Approval:**	Synthetic Approval Authority 8

I. Instructions and Record Identity

Incident Intake Form governs initial reporting of a suspected incident for Incident Response and authorized supporting roles.

The required control is to capture reporter, location, department, time, symptoms, and affected records. This document does not authorize activity outside its stated scope.

Control identifier CTL-018 distinguishes this requirement from similar controls in related documents.

II. Requester, Scope, and Dates

Accountable Owner means the role responsible for the incident intake record and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate enough facts to assign a provisional type and owner.

The originating operator supplies facts; the Incident Response reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2006 and 99 TST 2030, but each document retains its own decision boundary.

III. Risk and Control Selection

1. Create the incident intake record. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify enough facts to assign a provisional type and owner. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2031.

Field	Value	Required	Status
Record	incident intake reco	Yes	Entered
Owner	Incident Response	Yes	Verified
Control	CTL-018	Yes	Reviewed

IV. Review Decision and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-018. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2006 and 99 TST 2030 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Certification, References, and Retention

The authoritative output is the incident intake record; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2006; 99 TST 2030; 99 TST 2031.

Review this document on 2099-11-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
