Schedule Change Request

Effective Date:	2099-09-01	**Policy Number:**	TST-9011
Applicability/Class:	Synthetic Form	**Dept.:**	Scheduling Office
Date of Review:	2099-02-15	**Approval:**	Synthetic Approval Authority 9

I. Instructions and Record Identity

Schedule Change Request governs a requested change to approved controlled activity for Scheduling Office and authorized supporting roles.

The required control is to capture impact, reason, affected requests, and approval. This document does not authorize activity outside its stated scope.

Control identifier CTL-009 distinguishes this requirement from similar controls in related documents.

II. Requester, Scope, and Dates

Accountable Owner means the role responsible for the schedule change request and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate complete impact and conflict review.

The originating operator supplies facts; the Scheduling Office reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2003 and 99 TST 2011, but each document retains its own decision boundary.

III. Risk and Control Selection

1. Create the schedule change request. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify complete impact and conflict review. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2012.

Field	Value	Required	Status
Record	schedule change requ	Yes	Entered
Owner	Scheduling Office	Yes	Verified
Control	CTL-009	Yes	Reviewed

IV. Review Decision and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-009. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2003 and 99 TST 2011 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Certification, References, and Retention

The authoritative output is the schedule change request; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2003; 99 TST 2011; 99 TST 2012.

Review this document on 2099-02-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
