Controlled Access Exception Request

Effective Date:	2099-04-01	**Policy Number:**	TST-9001
Applicability/Class:	Synthetic Form	**Department:**	Information Technology
Date of Review:	2099-09-15	**Approval:**	Synthetic Approval Authority 4

I. Instructions and Record Identity

Controlled Access Exception Request governs a request for temporary controlled access for Information Technology and authorized supporting roles.

The required control is to capture requester, scope, risk, dates, and controls. This document does not authorize activity outside its stated scope.

Control identifier CTL-004 distinguishes this requirement from similar controls in related documents.

II. Requester, Scope, and Dates

Accountable Owner means the role responsible for the TST-9001 request and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate all required fields and reviewer certification.

The originating operator supplies facts; the Information Technology reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2001 and 99 TST 2002, but each document retains its own decision boundary.

III. Risk and Control Selection

1. Create the TST-9001 request. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify all required fields and reviewer certification. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2005.

Field	Value	Required	Status
Record	TST-9001 request	Yes	Entered
Owner	Information Technolo	Yes	Verified
Control	CTL-004	Yes	Reviewed

IV. Review Decision and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-004. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2001 and 99 TST 2002 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Certification, References, and Retention

The authoritative output is the TST-9001 request; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2001; 99 TST 2002; 99 TST 2005.

Review this document on 2099-09-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
