Technology Use Exception

Effective Date:	2099-11-01	**Policy Number:**	TST-9040
Applicability/Class:	Synthetic Form	**Dept:**	Cybersecurity
Date of Review:	2099-04-15	**Approval:**	Synthetic Approval Authority 3

I. Instructions and Record Identity

Technology Use Exception Request governs a temporary exception to technology-use controls for Cybersecurity and authorized supporting roles.

The required control is to capture business need, affected control, duration, risk, and compensating safeguards. This document does not authorize activity outside its stated scope.

Control identifier CTL-023 distinguishes this requirement from similar controls in related documents.

II. Requester, Scope, and Dates

Accountable Owner means the role responsible for the use exception request and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate time limit, accountable owner, and approved safeguards.

The originating operator supplies facts; the Cybersecurity reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2040 and 99 TST 2041, but each document retains its own decision boundary.

III. Risk and Control Selection

1. Create the use exception request. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify time limit, accountable owner, and approved safeguards. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2042.

Field	Value	Required	Status
Record	use exception reques	Yes	Entered
Owner	Cybersecurity	Yes	Verified
Control	CTL-023	Yes	Reviewed

IV. Review Decision and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-023. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2040 and 99 TST 2041 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Certification, References, and Retention

The authoritative output is the use exception request; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2040; 99 TST 2041; 99 TST 2042.

Review this document on 2099-04-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
