Incident Escalation

Effective Date:	2099-05-01	**Policy Number:**	99 TST 2031
Applicability/Class:	Synthetic Procedure	**Dept:**	Incident Response
Date of Review:	2099-10-15	**Approval:**	Synthetic Approval Authority 7

I. Purpose and Scope

Incident Escalation Procedure governs notification and escalation of active incidents for Incident Response and authorized supporting roles.

The required control is to notify the correct owner within the severity window. This document does not authorize activity outside its stated scope.

Control identifier CTL-017 distinguishes this requirement from similar controls in related documents.

II. Definitions and Responsibilities

Accountable Owner means the role responsible for the escalation log and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate severity, ongoing status, affected records, and missed controls.

The originating operator supplies facts; the Incident Response reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2006 and 99 TST 2030, but each document retains its own decision boundary.

III. Required Controls

1. Create the escalation log. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify severity, ongoing status, affected records, and missed controls. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2043.

IV. Procedure and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-017. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2006 and 99 TST 2030 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Records, References, and Review

The authoritative output is the escalation log; preserve its identifier, owner, timestamps, evidence, approval, and disposition.
