Mobile Device Use

Effective Date:	2099-10-01	**Policy Number:**	99 TST 2042
Applicability/Class:	Synthetic Standard	**Department:**	Information Technology
Date of Review:	2099-03-15	**Approval:**	Synthetic Approval Authority 2

I. Purpose and Scope

Mobile Device Standard governs mobile devices accessing organizational information for Information Technology and authorized supporting roles.

The required control is to enforce enrollment, encryption, locking, and reporting controls. This document does not authorize activity outside its stated scope.

Control identifier CTL-022 distinguishes this requirement from similar controls in related documents.

II. Definitions and Responsibilities

Accountable Owner means the role responsible for the device compliance record and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate managed state and supported security configuration.

The originating operator supplies facts; the Information Technology reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2040 and 99 TST 2041, but each document retains its own decision boundary.

III. Required Controls

1. Create the device compliance record. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify managed state and supported security configuration. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2043.

IV. Procedure and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-022. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2040 and 99 TST 2041 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Records, References, and Review

The authoritative output is the device compliance record; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2040; 99 TST 2041; 99 TST 2043.

Review this document on 2099-03-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
