Operational Readiness

Effective Date:	2099-11-01	**Policy Number:**	99 TST 2013
Applicability/Class:	Synthetic Checklist	**Dept:**	Operations Control
Date of Review:	2099-04-15	**Approval:**	Synthetic Approval Authority 1

I. Instructions and Record Identity

Operational Readiness Checklist governs readiness for scheduled controlled activity for Operations Control and authorized supporting roles.

The required control is to verify prerequisites immediately before execution. This document does not authorize activity outside its stated scope.

Control identifier CTL-011 distinguishes this requirement from similar controls in related documents.

II. Requester, Scope, and Dates

Accountable Owner means the role responsible for the readiness checklist and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate every mandatory check marked ready or formally waived.

The originating operator supplies facts; the Operations Control reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2003 and 99 TST 2011, but each document retains its own decision boundary.

III. Risk and Control Selection

1. Create the readiness checklist. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify every mandatory check marked ready or formally waived. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2022.

Field	Value	Required	Status
Record	readiness checklist	Yes	Entered
Owner	Operations Control	Yes	Verified
Control	CTL-011	Yes	Reviewed

IV. Review Decision and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-011. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2003 and 99 TST 2011 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Certification, References, and Retention

The authoritative output is the readiness checklist; preserve its identifier, owner, timestamps, evidence, approval, and disposition.
