Personnel Access Lifecycle

Effective Date:	2099-02-01	**Policy Number:**	99 TST 2051
Applicability/Class:	Synthetic Procedure	**Dept:**	Human Resources
Date of Review:	2099-07-15	**Approval:**	Synthetic Approval Authority 6

I. Purpose and Scope

Personnel Access Lifecycle Procedure governs onboarding, transfer, leave, and separation access changes for Human Resources and authorized supporting roles.

The required control is to coordinate identity changes with effective personnel events. This document does not authorize activity outside its stated scope.

Control identifier CTL-026 distinguishes this requirement from similar controls in related documents.

II. Definitions and Responsibilities

Accountable Owner means the role responsible for the access lifecycle event and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate verified person, role, manager, systems, and effective time.

The originating operator supplies facts; the Human Resources reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2050 and TST-9050, but each document retains its own decision boundary.

III. Required Controls

1. Create the access lifecycle event. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify verified person, role, manager, systems, and effective time. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2053.

IV. Procedure and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-026. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2050 and TST-9050 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Records, References, and Review

The authoritative output is the access lifecycle event; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2050; TST-9050; 99 TST 2053.

Review this document on 2099-07-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
