Privileged Access Review

Effective Date:	2099-05-01	**Policy Number:**	99 TST 2053
Applicability/Class:	Synthetic Procedure	**Dept:**	Cybersecurity
Date of Review:	2099-10-15	**Approval:**	Synthetic Approval Authority 9

I. Purpose and Scope

Privileged Access Review Procedure governs periodic review of elevated access for Cybersecurity and authorized supporting roles.

The required control is to reconcile approved need against observed privileged accounts. This document does not authorize activity outside its stated scope.

Control identifier CTL-029 distinguishes this requirement from similar controls in related documents.

II. Definitions and Responsibilities

Accountable Owner means the role responsible for the privileged access review and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate current owner, justified role, recent use, and remediation status.

The originating operator supplies facts; the Cybersecurity reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2041 and 99 TST 2050, but each document retains its own decision boundary.

III. Required Controls

1. Create the privileged access review. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify current owner, justified role, recent use, and remediation status. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in TST-9050.

IV. Procedure and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-029. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2041 and 99 TST 2050 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Records, References, and Review

The authoritative output is the privileged access review; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2041; 99 TST 2050; TST-9050.

Review this document on 2099-10-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
