Incident Reporting and Response

Effective Date:	2099-06-01	**Policy Number:**	99 TST 2006
Applicability/Class:	Synthetic Procedure	**Dept.:**	Information Technology
Date of Review:	2099-11-15	**Approval:**	Synthetic Approval Authority 6

I. Purpose and Scope

Incident Reporting and Response Procedure governs controlled-materials incidents for Information Technology and authorized supporting roles.

The required control is to intake, classify, contain, notify, and close the incident. This document does not authorize activity outside its stated scope.

Control identifier CTL-006 distinguishes this requirement from similar controls in related documents.

II. Definitions and Responsibilities

Accountable Owner means the role responsible for the incident record and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate containment plus complete owned closure actions.

The originating operator supplies facts; the Information Technology reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2030 and 99 TST 2031, but each document retains its own decision boundary.

III. Required Controls

1. Create the incident record. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify containment plus complete owned closure actions. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in TST-9030.

IV. Procedure and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-006. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2030 and 99 TST 2031 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Records, References, and Review

The authoritative output is the incident record; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2030; 99 TST 2031; TST-9030.

Review this document on 2099-11-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
