Activity Scheduling Procedure

Effective Date:	2099-08-01	**Policy Number:**	99 TST 2011
Applicability/Class:	Synthetic Procedure	**Dept:**	Scheduling Office
Date of Review:	2099-01-15	**Approval:**	Synthetic Approval Authority 8

I. Purpose and Scope

Controlled Activity Scheduling Procedure governs creation and modification of controlled schedules for Scheduling Office and authorized supporting roles.

The required control is to validate dependencies before publishing a schedule. This document does not authorize activity outside its stated scope.

Control identifier CTL-008 distinguishes this requirement from similar controls in related documents.

II. Definitions and Responsibilities

Accountable Owner means the role responsible for the schedule work item and the final disposition of its open actions.

Complete Evidence means evidence sufficient to demonstrate resource, owner, dependency, and approval readiness.

The originating operator supplies facts; the Scheduling Office reviewer verifies scope, authority, and conflicts.

Related terms may also appear in 99 TST 2003 and TST-9011, but each document retains its own decision boundary.

III. Required Controls

1. Create the schedule work item. 2. Identify the accountable owner. 3. Record the governing purpose and affected scope.

4. Verify resource, owner, dependency, and approval readiness. 5. Record exceptions and their expiration. 6. Preserve evidence of the decision.

A control is incomplete when its owner, time boundary, authoritative reference, or required evidence is missing.

The reviewer must distinguish this control from the related but non-equivalent requirements in 99 TST 2013.

IV. Procedure and Exceptions

1. Intake the request or event. 2. Validate identity and applicability. 3. Apply CTL-008. 4. Record the outcome.

If facts are ambiguous, request the missing operational fact instead of guessing a department, incident type, or authority.

An exception is time bounded, identifies compensating controls, and links to both 99 TST 2003 and TST-9011 when applicable.

Urgency does not remove evidence, logging, notification, or later review requirements.

V. Records, References, and Review

The authoritative output is the schedule work item; preserve its identifier, owner, timestamps, evidence, approval, and disposition.

References: 99 TST 2003; TST-9011; 99 TST 2013.

Review this document on 2099-01-15 or after a material control failure, whichever occurs first.

Corrections append a new traceable version and never silently overwrite prior provenance.
